Early earthworks continuing for Western Sydney International, Badgerys Creek

Dear neighbour,

Early earthworks for Western Sydney International are continuing with the construction of a new, realigned section of Badgerys Creek Road between Elizabeth Drive and Longleys Road as well as completion of cut and fill works, totaling around 1.8 million cubic metres of earth. This work includes:

- construction of a new roundabout and civil works on Elizabeth Drive
- bulk earthworks
- asphaltting and installation of concrete pavements
- new stormwater drainage installation
- adjustment and connection of utilities
- connection of new communication infrastructure.

Night work for communications services

Work will be carried out by Telstra from 6pm to 5am on one evening between 18 November and 22 November, weather permitting, to connect new communications infrastructure. This work is not expected to be noisy and will be carried out near the intersection of Longleys Road and Badgerys Creek Road, and behind the concrete barriers on the northern side of Elizabeth Drive.

Elizabeth Drive

Pavement activities and other works will continue along Elizabeth Drive between Badgerys Creek Road and Lawson Road behind concrete barriers.

Badgerys Creek Road realignment

Work is ongoing along Badgerys Creek Road between Pitt Street and Longleys Road behind concrete barriers. These works will enable the connection from the existing to the new Badgerys Creek Road realignment. Asphaltting of the new Badgerys Creek Road is planned to commence from Monday, 11 November, weather permitting.

Night works including saw cutting will continue along the realignment throughout November and will be carried out between 6pm and 12am from Monday to Friday. This work is not expected to be noisy.

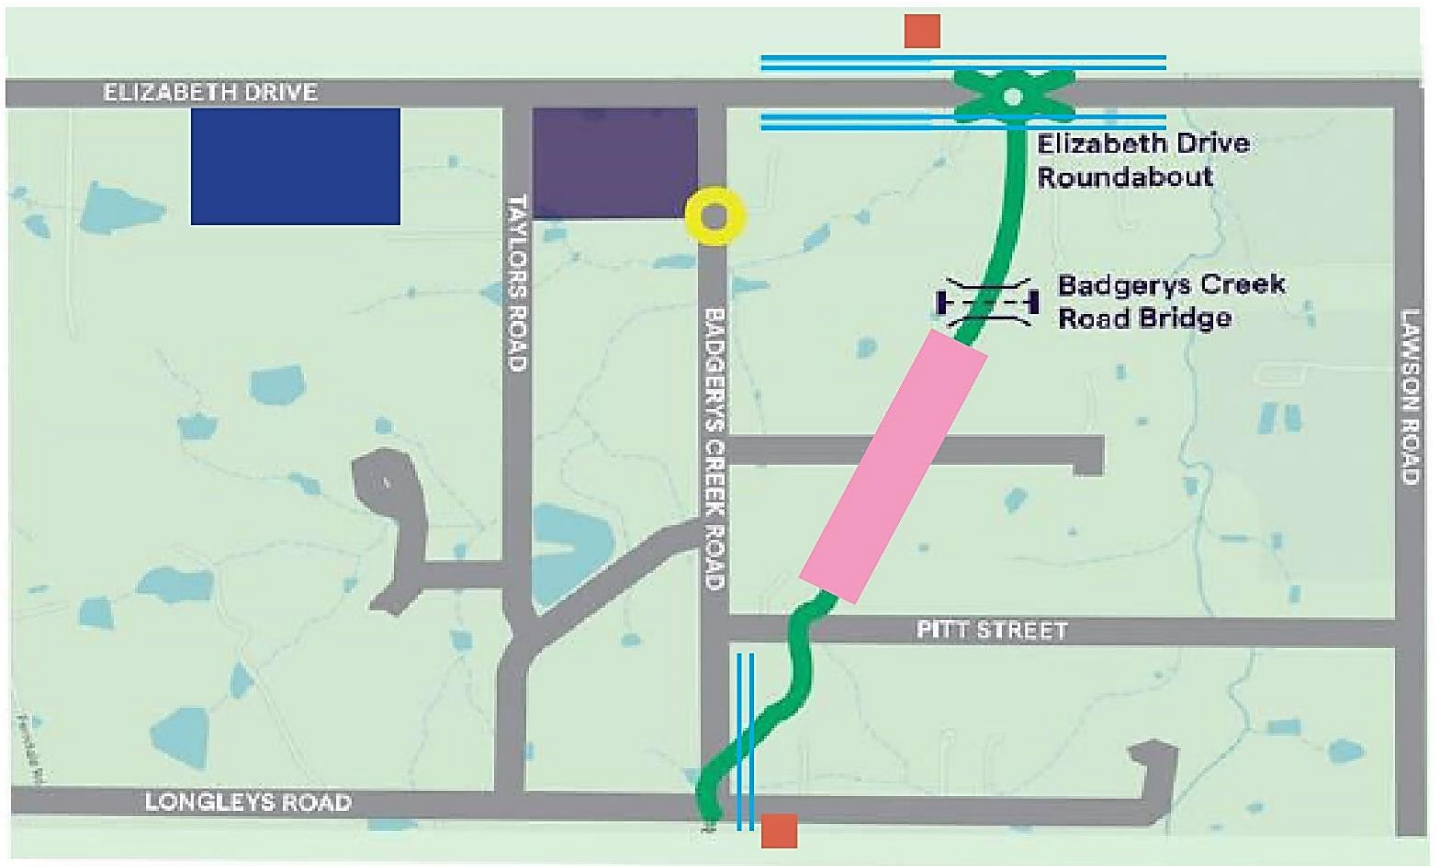

Traffic changes

Please keep to the speed limits, follow the direction of traffic controllers and signs and be aware of other road users and vehicles when in the area. As the Project site is separated by Badgerys Creek Road, any plant or machinery crossing the Road is carried out under strict traffic control. We thank motorists for their patience during work.

Early earthworks are being carried out by the CPB Contractors and Lendlease Joint Venture (CPBLL JV) and are expected to be completed in 2020.

Early earthworks site, October 2019
