

## Environment and Sustainability Statement of Commitment

Our environmental and sustainability vision is to design, build and operate a safe, thriving and sustainable airport. Western Sydney International (Nancy-Bird Walton) Airport. We understand how important it is that airports, and the aviation sector more broadly, show leadership in tackling climate change, reducing pollution and landfill, delivering positive social outcomes for communities and conserving natural resources.

Our commitment is for Western Sydney International (Nancy-Bird Walton) Airport to have net positive benefits to communities, the environment and the economy. We will look for opportunities to take ambitious, leading approaches across the environment, social and governance spectrum by:

- Ensuring the WSA vision and values are at the core of everything we do.
- Recognising the importance of the natural environmental, cultural heritage and social values of the Airport Site and seek to enhance these values during our activities.
- Showing visible leadership of environmental protection and sustainability.
- Complying with the full range of environmental conditions required by the Airport Plan and any other relevant environmental legislation.
- Properly implementing, regularly monitoring and auditing environmental controls to assess their effectiveness.
- Developing and implementing an environmental management system that meets the requirements of ISO14001:2015.
- Designing, building and operating sustainable airport facilities and buildings that demonstrate leadership in environmental management and sustainability and provide net positive benefits for society, environment and the economy.
- Engaging with suppliers and businesses that share WSA's values, especially on diversity, human rights, First Nations, environment, sustainability and leadership.
- Supporting and promoting the social, physical and psychological health and wellbeing of our people, visitors and community.
- Collaborating and sharing our experience and knowledge with others.
- Contributing to environment and sustainability objectives at local, state, national and global levels.
- Embedding environment and sustainability considerations into key project decisions across the project lifecycle.
- Providing appropriate training and resources to meet our obligations and commitments.
- Publicly reporting on environmental, social and sustainability performance.
